Re: Transmittal of Quarterly Site Progress Report, First Quarter 2024, 2000 Race Street Site, Baltimore, Maryland

Dear Mr. Hammerberg:

Please find attached the First Quarter 2024 Site Progress Report for the 2000 Race Street Site, Baltimore, Maryland. This document is provided on behalf of Honeywell and the Mayor and City Council of Baltimore pursuant to the General Inspection Requirements of Section II.C of the Controlled Hazardous Substance Post-Closure Permit issued by the Maryland Department of the Environment (MDE) for the 2000 Race Street Site, effective September 27, 2019.

If you have any questions or require additional information, please do not hesitate to contact me at 973-455-2877, or by e-mail at Eric.Christodoulatos@Honeywell.com.

Sincerely,

Eric Christodoulatos

Senior Remediation Manager

A Site Inspection Reports

## 1. Introduction

Honeywell International Inc. (Honeywell) and the Mayor and City Council of Baltimore City (City) are submitting this Quarterly Site Progress Report for the 2000 Race Street Site (Site) pursuant to the General Inspection Requirements of Section II.C of the Controlled Hazardous Substance (CHS) Post-Closure Permit issued by the Maryland Department of the Environment (MDE) for the 2000 Race Street Site on September 27, 2019. Quarterly Site Progress Reports are to be submitted to MDE and include the following information:

- · Work completed and documents submitted to MDE in the preceding quarter
- A schedule and submittals for the upcoming quarter
- Any delays, modifications, or changes anticipated in the upcoming quarter.

This report covers Site-related activities conducted under the CHS permit during the first quarter of 2024, from January 1, 2024, through March 31, 2024.

The Site is located at 2000 Race Street, Baltimore, Maryland (zip code 21230). It occupies approximately 10.3 acres and is bounded on the north by the Baltimore Gas and Electric Spring Gardens facility, on the south by Swann Park, on the east by Race Street and on the west by the Middle Branch of the Patapsco River. In addition, two elevated spans of Interstate 95 (I-95), oriented from east to west, overlie the Site on the northern half of the property. A chain-link security fence is present at the perimeter of the Site. The Site has no onsite building structures and is currently vacant.

Controlled hazardous substances are contained on the Site and are covered with an engineered cap consisting of the following materials from top to bottom: asphalt, gravel base, and compacted clay. The cap was completed at the end of 2019 and was implemented pursuant to the Controlled Hazardous Substances Permit. Cap maintenance is ongoing.

Additional information regarding the Site includes the following: May 23, 2007, Consent Order; Site Characterization Work Plan, dated September 2007; Site Characterization Report, dated September 2009; Near Shore Investigation Report, dated December 2009; Interim Remedial Measures Assessment Investigation and Pilot Test Report, dated July 2012; Supplemental Site Characterization Report (former arsenic shed area), dated February 2018; Interim Remedial Measures Assessment (IRMA) Report, dated August 2018; the Corrective Measures Alternatives Analysis Report, dated August 2018; Post-Closure Controlled Hazardous Substance (CHS) Permit issued by MDE, dated September 27, 2019; Cap Construction Completion Report, dated June 2020; and 2020 Groundwater Monitoring Data Report, dated March 2021.

## 2. First Quarter 2024 Review

Site-related activities performed during the first quarter of 2024 include the following:

- Jan. 8: Sitewide and PRB groundwater monitoring
- Jan. 10: Project Coordinator call with MDE
- Jan. 25: Monthly Site status inspection (Appendix A)
- Jan. 29: Submitted the fourth quarter 2023 Site Progress Report to MDE
- Feb. 5: Sitewide groundwater monitoring
- Feb. 14: Project Coordinator call with MDE
- Feb. 29: Monthly Site status inspection (Appendix A)
- Mar. 4: City of Baltimore cleaned debris on Site
- Mar. 4: Sitewide groundwater monitoring

- Mar. 8: Submitted Annual Groundwater Monitoring Report to MDE
- Mar. 13: Project Coordinator call with MDE
- Mar. 21: Monthly Site status inspection (Appendix A)

## **Honeywell**

## 3. Upcoming Work – Second Quarter of 2024

The following activities and submittals are anticipated to occur in the upcoming quarter:

- Monthly Site status inspections and participate in monthly Site status calls with MDE (April, May, and June)
- Submit the first quarter 2024 Site Progress Report to MDE
- Sitewide groundwater monitoring
- Quarterly semiannual shape accel array/inclinometer readings.

## 4. Schedule

A schedule of CHS permit activities anticipated during the second quarter of 2024 is provided in the following table.

| Milestone                               | Anticipated Date |
|---|------------------|
| April 2024                              |                  |
| Perform Sitewide groundwater monitoring | 4-1-24           |
| Perform monthly Site status inspection  | 4-18-24          |
| Submit Q1 2024 Site Progress Report     | 4-30-24          |
| May 2024                                |                  |
| Perform monthly Site status inspection  | 5-16-24          |
| June 2024                               |                  |
| Perform monthly Site status inspection  | 6-20-24          |

| Inspector:   | Bill Morris  | Date of Inspection:  |                | 21-Mar-24  |
|--|--|--|----------------|--|
| Title:   | Environmental Engineer   | Date of Last Inspection:   |                | 29-Feb-24  |
| Organization:  | Jacobs   | Weather:   |                | Cold, Sunny  |
| Site Inspection  | Results  |  |                |  |
| Task   | Observations   | Actions Taken  | Date Completed | Comments/Additional Observations   |
| 1. General   |  |  |                |  |
| Inspect site for presence of surface debris. Identify type, approximate volume of debris, and location   | None   | None   | NA             | City of Baltimore performed debris clean up on 3/4/2024.   |
| via description or on Site Plan (attach to Monthly Site Inspection Checklist).   |  |  |                |  |
| Inspect site for presence of vegetation. Identify  | 2. Vegetation growth along shoreline   | City potified of pood to implement   | 3/13/2024      | City of Baltimara to address vagatation control of   |
| estimated amount and location of vegetation via description or on Site Plan (attach to Monthly Site Inspection Checklist)  | Vegetation growth along shoreline.     Vegetation growth along fence line.   | City notified of need to implement vegetation control  | 3/13/2024      | City of Baltimore to address vegetation control as part of site maintenance.   |
| 2. Interstate 95 Footings and Joints   |  |  |                |  |
| Inspect around pier footings for settlement. Identify settlement off-set from grade and location via description or on Site Plan (attach to Monthly Site Inspection Checklist)         | Asphalt settlement adjacent to pier footing.   | City notified of settlement issue  | 3/13/2024      | City to address settlement repair as part of site maintenance  |
|  | None   | None   | NA             | NA   |
| 3. Engineered Cap  | <del>_</del>   |  |                | ,  |
| Inspect cap for alligator cracking. Identify estimated area of cracking and location via description or on Site Plan (attach to Monthly Site Inspection Checklist)                     | None   | None   | NA             | NA   |
| Inspect cap for holes. Identify number of holes, width and depth, and location via description of on Site Plan (attach to Monthly Site Inspection Checklist)                           | None   | None   | NA             | NA   |
| Inspect cap for cracks less than 0.5 inches wide. Note number of cracks. Identify location of cracks via description or on Site Plan (attach to Monthly Site Inspection Checklist).    | 2: Crack with vegetation growth.   | City notified of need to implement vegetation control  | 3/13/2024      | City of Baltimore to address vegetation control as part of site maintenance.   |
| Inspect cap for cracks greater than 0.5 inches wide. Note number of cracks. Identify location of cracks via description or on Site Plan (attach to Monthly Site Inspection Checklist). | None   | None   | NA             | NA   |
| Inspect cap for any signs of ponding of water  | None   | None   | NA             | NA   |
| Inspect shorefront embankment for evidence of erosion or releases  | None   | None   | NA             | NA   |
| Identify any other observations related to the condition of the cap and potential for cap damage   | Sediment accumulation     Sediment with vegetation growth     Settlement along slope adjacent to asphalt     Crack in asphalt curb | City notified of need to implement vegetation control, sediment cleanup and settlement issue | 3/13/2024      | City to address additional sediment cleanup along southern curb, vegetation control, and settlement repair as part of site maintenance |

| Site Inspection   | Results                                    |   |                |  |
|---|--|---|----------------|--|
| Task  | Observations                               | Actions Taken                                       | Date Completed | Comments/Additional Observations                             |
| 4. Fence  |  |   | 1 •            |  |
| Inspect fence for holes. Note number of holes. Identify location of holes via description or on Site Plan (attach to Monthly Site Inspection Checklist).  | None                                       | None  | NA             | NA   |
| Inspect fence to determine if there is any erosion compromising the integrity of the fence  | None                                       | None  | NA             | NA   |
| Inspect fence to determine if barbed wire is in good condition  | None                                       | None  | NA             | NA   |
| Inspect gates, chains, and locks for damage Inspect fence to determine if any vegetation is damaging or otherwise compromising fence  | None                                       | None<br>None  | NA<br>NA       | NA<br>NA   |
| Inspect fence to determine if there is any burrowing beneath fence  | None                                       | None  | NA             | NA   |
| Identify any other observations related to the condition of the fence and potential for fence damage (e.g., points of weakness, corrosion)  | None                                       | None  | NA             | NA   |
| 5. Aboveground Stormwater Conveyance System   |  |   | 1              | I  |
| Inspect aboveground stormwater conveyance system including piping, downspouts, and drain in southwest corner of site for proper operation   | 7: Disconnected fitting at downspout       | City notified of need to implement site maintenance | 3/13/2024      | City to address downspout repair as part of site maintenance |
| 6. Vandalism  |  |   |                |  |
| Inspect site for any vandalism including any dumped material on-site and damage to monitoring wells   | None                                       | None  | NA             | NA   |
| Identify any other observations related to vandalism on the site  | None                                       | None  | NA             | NA   |
| 7. Signage  |  | •   |                |  |
| Inspect warning signs on exterior perimeter of fence to determine condition and readability. Identify number of signs removed/damaged/unreadable and locations via description or Site Plan (attach to Monthly Site Inspection Checklist) |  | None  | NA             | NA   |
| 8. Miscellaneous Items  |  |   |                |  |
| Any interaction with people on or adjacent to the site? If yes, identify who, title, organization, contact information, and content of interaction  | Al Simkins with MDE was on site for the mo | nthly inspection.                                   |                |  |
| Other Comments/Observations?  | None                                       |   |                |  |
