An Online Newsletter from Honeywell

Honeywell, a global technology and manufacturing leader, is the successor of one-time Baltimore industrial presence Allied Chemical. In the Baltimore area, Honeywell is responsible for the environmental legacies of industrial sites that were owned or affected by the operations of Allied Chemical.

In addition to our proactive approach to working with local communities on the remediation of these sites, we are committed to bringing our innovative corporate citizenship initiatives, which have been developed in partnership with leading public and non-profit institutions, to the Baltimore area.

## Vision of Improved Swann Park

## Rebuilding Together in Turner Station

## A New And Improved Swann Park

**May 3, 2008** — Mayor Sheila Dixon and Honeywell today announced that construction of a new and improved Swann Park will begin next week when Honeywell starts restoration of the park. Honeywell and Baltimore City have worked in partnership to restore Swann Park.

Honeywell will prepare and seed the ball fields, make water and electrical improvements and build foundations for lighting, dugouts, fences, bleachers, pedestrian pathways and roadways before turning the park over to the city later this year.

On April 26, Honeywell volunteers partnered with Rebuilding

From left, Baltimore City Mayor Sheila Dixon; Dr. Joshua M. Sharfstein, Baltimore City Health Commissioner; David Wickersham, Honeywell Director of Global Remediation Services; and Portia Harris, Acting Director, Baltimore City Recreation and Parks.

"I want to thank Honeywell for stepping up and for fulfilling its commitment," said Mayor Dixon. "I also want to thank the community for its patience and support as we worked

through this difficult issue. When construction is complete, South Baltimore will have a terrific new park that will offer a safe and attractive space for sports and recreation activities. Swann Park will be another jewel in the crown of a cleaner, greener, healthier and safer City. The restoration of Swann Park would not have happened without a strong partnership between Honeywell and the City."

"Today we begin the transformation of Swann Park," said David Wickersham, Honeywell's Director of Global Remediation Services. "We applaud the Mayor's leadership and commitment as well as the dedication of her office and those at the Department of Recreation and Parks for forging this strong partnership. We look forward to seeing the park once again full of activity and available to all those who have spent so many years enjoying it."

Maryland State Delegate Brian McHale (District 46) also attended the event. "I was most impressed with Honeywell's attitude and commitment to restoring Swann Park," he said. "The executives from Honeywell stepped up and said, 'We are going to make this right. We are going to work in partnership with the city, clean up the park and return it as quickly as possible to the users.'"

Work should be completed by the end of August and will enable the city to move forward with the final park improvements. The contractor performing the remediation will be MARCOR Remediation, Inc., a nationally-recognized environmental remediation contractor with corporate headquarters in Hunt Valley, Maryland, and a Baltimore operation on Vero Road.

Together Baltimore to refurbish Turner Station homes. Volunteers helped homeowners live in the safety and comfort of their own homes by pitching in to paint rooms and fix plumbing. They also planted trees and flowers.

### **Baltimore Rowing Club to christen new boats**

Honeywell will join members of the Baltimore Rowing Club Juniors' team May 4 to christen three new racing boats at the conclusion of the Baltimore High School Championships Regatta. A grant from Honeywell purchased two new boats — "The Ariel" and "The Middle Branch" — while support from the Turner Development Group purchased a third — "Turner's Triumph." Teams will also compete for the Honeywell Cup, which will be presented to the winning high school.

Defenders Baseball Club in South Baltimore join Honeywell, state and city officials to celebrate the groundbreaking of their park.

When Swann Park reopens, it will feature improved lighting, ball fields, pedestrian pathways and other enhancements.
